Since 2013, technological developments in Cuba have allowed for a fundamental reconfiguration of the cultural, economic, social, and political spheres of the Revolutionary project. As internet access on the island continues to expand, citizens challenge state policies on the speed, breadth, and freedom of said access. This Cuban reality speaks to the impact of technology in authoritarian states and transitional democracies. While the streets of Cuba may still belong to Castro’s Revolution, Dr. Henken argues, it is still unclear to whom Cuban cyberspace belongs.
